Summary

Frontend Developer with commercial experience building responsive, user-centric web applications and optimizing client-side performance. Specialized in React, TypeScript, and modern state management (Redux Toolkit). Skilled in translating complex Figma/mockup designs into pixel-perfect, scalable UIs, refactoring legacy codebases, and integrating REST APIs. Passionate about clean code architecture, type safety, and seamless mobile-first user experiences.

Skills

Languages & Core:

JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS

Frameworks & Libraries:

React 18, Redux Toolkit, React Router, Vite, Next.js (Basics)

Styling & UI:

Tailwind CSS, styled-components, Material UI (MUI), Bootstrap

Forms & API Integration:

Formik, Yup, Axios, REST API

Tools & Workflow:

Git, GitHub, Jest, Webpack, WordPress CMS

Professional Experience

Frontend (WordPress) Developer, MKEY Media

02/2026 – 03/2026 | Kharkiv, Ukraine

- Developed and optimized responsive, high-performance UI components for corporate web applications.
- Customized WordPress CMS themes utilizing modern CSS (Flexbox, Grid) to deliver fully adaptive layouts across screen sizes.
- Integrated custom JavaScript interactive modules and third-party plugins to improve user engagement and site functionality.
- Conducted page speed optimization, significantly improving core performance metrics and loading times.

Frontend Developer, Leo-Source

2021 – 2024

- Architected and maintained reusable UI component libraries using React, TypeScript, and styled-components/MUI.
- Converted complex design mockups into pixel-perfect, fully responsive web layouts adhering to a mobile-first philosophy.
- Refactored and modularized legacy codebases to improve code maintainability, type safety, and overall application stability.
- Wrote unit and integration tests using Jest to achieve high code coverage and prevent regressions.
- Conducted cross-browser testing, debugging, and continuous performance optimization for fluid rendering.
- Participated in peer code reviews, mentored onboarding team members, and maintained thorough technical documentation.

Courses

Full-stack Developer Course, GoIT

2026 – Present

B.S. in Software Engineering,

Kharkiv National University of Economics

2018 – 2022 | Kharkiv, Ukraine

Certifications:, freeCodeCamp (Responsive Web

Design, JS Algorithms, Frontend Development Libraries)

2025 – 2026
